Kelowna, British Columbia, Thursday, April 13th, 1922

NUMBER 34

## CASE IS PRESENTED FOR MONEY BY-LAWS

Proposed Expenditures Explained At Public Meeting

The City Council has a habit of setting the date of public meetings in regard to matters requiring the sanction of the ratepayers so close to the date of polling that a report cannot be published before the latter takes place, and the interest of such a report to our readers is accordingly diminished in large degree. But we have to think of many absentees who follow the affairs of the city with interest, which is our excuse for reporting any such meetings at length. At that which was held in Wesley Hall on Thursday evening about fifty of both sexes were present. The proceedings were tame throughout and any spirit of opposition that might have been in existence was by no means conspicuous, so it is a reasonable inference that the people of Kelowna have entire faith in the management of their business by the Council.

On motion of Ald. Rattenbury, Mr. D. Lockie took the chair. Wasting no time in preliminaries, he called upon Ald. Barrat, chairman of the Water Committee.

Ald. Barrat confessed to very little experience in municipal affairs but he ventured to say that seldom, when By-Laws were submitted to the ratepayers for approval, was the argument so much all on one side as in the present case. The proposed expenditures would provide greatly increased service at lower cost, and a saving of \$13,000 would be effected. On pay-roll alone, which would leave a considerable balance to the good over and above the interest and sinking fund on the total sum of \$91,000. The reservoir would enable water to be delivered much more cheaply. He was not in a position to say what the rate would be, but it was the opinion of the Council that the rate for quantities in excess of the minimum could be reduced to half the present charge. Steady pressure on the mains would improve fire protection very much, and the reservoir would also obviate the danger of such an occurrence last year as the breaking down of the pumps on the occasion of the fire at the Dominion Cannery, which happened, fortunately, when the fire was about over, but might have been disastrous. Insurance rates would also be favourably affected, according to the fire underwriters, who had been urging installation of a reservoir for years past.

Suppose the By-Laws were not passed, what would be the alternative? Mr. Barrat? The Council had been trying to find means of lowering the tax rate but, if the By-Laws were defeated, the rate would have to be increased, as some of the requirements were essential and would have to be provided, in that case, out of current revenue. The present pumping plant was practically obsolete, and would have to be renewed at a high cost, and would not give the same satisfactory results as a gravity supply from a reservoir.

The City's engineers had carefully examined all available sites for the reservoir, and the choice had narrowed down to one, which was desirable in every way except that it was a little high, the elevation, at 263 feet above lake level, being about forty feet higher than the ideal height. To place the reservoir at an ideal elevation, the site would have to be a clay bank which was a great disadvantage. Before committing themselves definitely to the site chosen, the Council would have to inspect by one of the best engineers in the province.

Ald. Barrat's remarks were cordially received, and the other speakers were also applauded. Chairman of the Light Committee, said the subjects of water and light service were of vital interest, particularly as they affected the pocket-book, and it, by the passage of the By-Laws, the cost of these services to the consumer could be reduced, then the By-Laws should be passed unanimously. Some might think the present lighting system was good enough, but if they knew the condition of things, they would realize the need of the contemplated expenditure. The amount of power generated was metered about a year ago, and it was found that there was between 30 and 40 per cent of loss. The wiring was too light, heavier wires were needed, and the transformers were overloaded in some cases as much as 300 per cent over capacity. Some of the transformers had not been placed, where they should, and connections were added that should not have been made. Many of the poles were in dangerous condition and would have to be replaced. Completion of hydro-electric installation this year would render it absolutely necessary that the line loss be materially reduced, otherwise the City would be paying for power which would be lost in distribution. The present cost of fuel, about \$18,000 a year, would be about offset by the cost of power, but there would be a saving of some \$13,000 in wages in the water and light departments.

The main reason for the proposed expenditure on the light system was to put it in such shape as to reduce line loss to a minimum, and in the end there would be such a saving that it would be possible to reduce the rates by perhaps one-third. The \$20,000 would be divided between \$15,500 for pole line construction, \$3,500 for new connections and \$1,000 for new conductors. Since Superintendent Blakeborough had taken over the water and

## WESTBANK

Mr. J. W. Hughes, of Kelowna, was a business caller here on Monday. Mrs. A. Nichol and her little son Leonard left Monday morning for Alberta.

Mr. Saunders, of Vernon, who buys hides, was here canvassing the district Monday, making purchases. The young people met at Mr. W. B. Gore's home Sunday evening for song service, and all enjoyed the singing.

Mr. and Mrs. Exell left here Thursday morning for their extended visit to England, by way of across Canada. Mr. Gustavson, who has been here on business for some weeks, left for his home in Saskatchewan on Thursday morning's boat.

The Dramatic Club met for a practice at Mr. Laing's home Saturday evening. They are progressing splendidly and every one is looking forward to the event.

The directors of the Westbank Irrigation Company made a trip of inspection of the system, on Monday, to ascertain what repairs were needed for the ensuing year.

Mr. Featherstonhaugh, who moved away from here last Spring, is now, we are pleased to hear, moving back again, having purchased a tract of land from Mr. K. Keeler, and has begun making improvements.

Engineer Groves, of Kelowna, is engaged at present running a line for the main line of the new Irrigation District. He is assisted by Messrs. Paynter, Talhurst, E. Smith and E. Hewlett.

Messrs. Gates and Smith were new settlers to Glenora last week. Mr. Gates has purchased Mr. C. Last's property, and intends to run a small store. Mr. Smith purchased what is known as the Hockley Ranch.

The ladies who are sewing for the Bazaar met at Mrs. Pritchard's home Wednesday. They are hastening with their work as considerable is unfinished and as their Bazaar date is on April 19, only leaving them a week and a half to complete their work.

A whist drive was held Friday evening in the School-house, the proceeds being for the community piano. A good sized crowd was present and lunch served as usual. The prizes were awarded to Mrs. J. Jones and Mr. E. C. Paynter. The proceeds amounted to about \$29.00.

A serious accident happened here Saturday morning when Mr. H. Hironaka was repairing his spray engine. His glove caught and pulled his hand into the cogs, cutting off his fourth finger of the left hand and crushing two others. Mr. W. Maynard, a hired man with him to the Kelowna Hospital.

Mr. Reese, who recently purchased the Duncan lot, is making extensive improvements to the home. He has dug a large cellar, and is putting a cement foundation under the cellar, he thought that he had found a hidden treasure when he accidentally discovered a roll of bills, but on a thorough search only two bills were found.

## THE K.A.A.C. HOLDS ITS ANNUAL MEETING

The annual meeting of the Kelowna Amateur Athletic Club was held on Monday evening in the Board of Trade Rooms.

The meeting was a big success in every way, the attendance being the largest in the history of the club, showing that the general public are becoming more interested in the welfare of this worthy organization and are anxious to do all in their power to make the coming season's sport a record breaker.

The following officers were elected for the coming year: President, Mr. H. F. Chapin; Vice-President, Dr. Wright; Sec.-Treas., Mr. J. C. Urquhart; Executive: Messrs. G. Tutt, Garner, Lees and Buckland.

Several important matters regarding sport in the district were discussed and many and varied suggestions made to the executive for their future guidance. An interesting feature suggested at the meeting was the holding of a field day for the Public Schools, when the scholars of all the schools in the Okanagan Valley will be invited to compete.

## SMOKER HELD BY "D" COMPANY R.M.R.

City Band Furnishes Music Of High Order

On Wednesday night of last week the G.W.V.A. Club was given over to the members of "D" Company, 172nd Batt. R.M.R., who held a most successful and enjoyable smoker. Business matters were disposed of during the evening regarding the disposal of pay and election of financial, sports and entertainment committees. Vocal and other selections were given by the following:—Messrs. Graves, Gowen, Holes, Davis, Dick, Morley, McDougall and Dr. Wright. The chair was occupied by the O.C., Major H. H. B. Abbott. Mayor D. W. Sutherland, who was also present, received well deserved applause. Refreshments were served during the evening.

An agreeable feature of the entertainment was the first public appearance of the reorganized City Band which attended in full force. They received well deserved applause for their skillful rendition of musical items of a varied character throughout the evening, displaying a high order of technique which drew favourable comments from their hearers.

## LITTLE OPPOSITION TO MONEY BY-LAWS

All By-Laws Passed By Decisive Majorities

The voting on the Money By-Laws took place yesterday with the following results:—

By-Law No. 333, "Fire Apparatus Loan By-Law, 1922." For, 144; against, 11; spoiled, 0; total, 155.

By-Law No. 334, "The Electric Light System Alteration and Improvement Approval By-Law, 1922." For, 150; against, 5; spoiled, 0; total, 155.

By-Law No. 335, "Electric Light Loan By-Law, 1922." For, 144; against, 5; spoiled, 6; total, 155.

By-Law No. 336, "The Water Works and Supply System Alteration and Improvement Approval By-Law, 1922." For, 140; against, 13; spoiled, 2; total, 155.

By-Law No. 337, "Water Works Loan By-Law, 1922." For, 135; against, 14; spoiled, 6; total, 155.

A new lodge room was inaugurated last week by Orion Lodge, A.F. & A.M., Penticton, in the presence of over two hundred members of the craft.

## KELOWNA LAWN TENNIS CLUB

Work Has Commenced On Three Courts

(Contributed)

Dr. Boyce and the organizing committee of the Kelowna Lawn Tennis Club wish to tender their hearty thanks to the public for the generous way in which they are taking up the debt of the Club.

Plans are being considered for the erection of an up-to-date and fully modern Pavilion with dressing-rooms for men and women, tea room and a large verandah. Work has already commenced on the three North courts, and, weather permitting, we should easily be ready to start the season's play on May 1st.

In the past the great objection to clay courts has been, firstly, the glare of the sun on the surface, and, secondly, the dust which accumulates during play. Both these drawbacks will be overcome by employing the methods used on the "Red Rubble" courts so popular in Europe: although this entails a considerable expense, we feel the players will be amply recompensed by the extra comfort and cleanliness obtained.

## SACRED CANTATA SUCCESSFULLY RENDERED

"From Olivet to Calvary" Given By United Church Choir

The augmented choir of the Kelowna United Church is to be heartily congratulated on the undoubted success of the concert given by them last Friday evening at the church, under the able direction of the choir-master, Mr. F. Wigglesworth.

The first part of the programme was devoted entirely to secular music, consisting of solos and choruses, the excellence of which was testified by the marked applause given by the audience. The second part was taken up by the rendering of J. H. Maunders' sacred cantata, "From Olivet to Calvary," a work which entailed a great deal of effort and strenuous practice on the part of the choir in its preparation. In their interpretation of the reverent and solemn passages of the music and theme, as well as the intensely passionate climax, culminating in the betrayal and crucifixion of the Saviour, the choir showed a clear conception and grasp of the composer's ideas, and great credit is due to the choir-master for his patient and skilful instruction and to the soloists and members of the choir for their devotion and regular attendance to practice. The cantata was repeated at the following Sunday evening's services.

The programme was as follows:—

Chorus: "Bridal Chorus"..... Cowen

CHOIR

Solo: "My Ships"..... Barratt

Mrs. J. N. THOMPSON

Part Song: "Rat-a-Plan"..... De Rille

CHOIR (A.T.B.B.)

Solo: "Break o' Day"..... Sanderson

Mrs. J. HARVEY

Duet: "No, John, No!"..... Mrs. L. DILWORTH, Mr. F. WIGGLESWORTH

Part Song: "Evening Has Lost Her Throne"..... Bantock

Part 2

Cantata: "From Olivet to Calvary"..... J. H. MAUNDERS

CHOIR

The solos in the cantata were sung by Mrs. J. Harvey, Mrs. E. D. Branden, Miss A. Fleming, Miss Austen, Messrs. J. Hall, E. O. MacGinnis, J. N. Thompson, G. S. McKenzie, D. McFarlane, and F. Wigglesworth. Mrs. E. Hill accompanied on the piano whilst Mr. F. Wigglesworth presided at the organ. Little Miss Frida Dilworth very sweetly sang a verse of the hymn, "Just As I Am."

## FRUIT MEETING LASTS ALL DAY

Charges Of Price Cutting Are Aired But Proceedings Less Stormy Than Expected

Limp after five and a half hours' note-taking, the unfortunate scribe surveyed with sinking heart on Tuesday evening a mass of more or less incoherent and illegible material, covering sixty pages of his note-book, from which to attempt to write an account of the meeting in the *Enquirer* Theatre that day, and with so little time available before going to press, first, to prepare presentable "copy" and typewrite it and, second, set it up in type, ruthless condensation became necessary, or "boiling down" in journalistic lingo. Hence our story of the meeting will doubtless be found by many to abound in short-comers, but we cannot accept the responsibility, which falls upon those who expect from the limited facilities of a rural weekly the same service as from a city daily, and ignore our repeated plea for Friday or Saturday meetings, if they wish full reports.

After a delay of nearly half an hour after the advertised time of 10 a.m., during which those present became somewhat impatient, Mr. J. W. Jones, M. L. A., who presided over the first meeting a month ago, took the chair and opened the proceedings. He was accompanied to the platform by Mr. R. M. Winslow, Secretary of the B.C. Traffic & Credit Association, Mr. E. Doberer, President of that organization, and by the members of the Growers' Committee, including General Harman, Messrs. J. E. Taylor, A. Lewis, P. A. Lewis, J. E. Taylor, G. W. Strang and Capt. Bull.

The attendance gradually grew until between two and three hundred were present, including a number of growers from points along Okanagan Lake.

In his opening remarks Mr. Jones welcomed the presence of so many fruit-growers—from lake-points and beyond—the bad state of the local roads had evidently prevented a number of people in the neighbourhood from attending. The gathering, however, was a fairly representative one of the Okanagan's most important industry, an industry which was valued at about \$35,000,000. It was, perhaps, not generally known that the packing houses and canneries in Kelowna paid out in wages alone last year an amount of \$650,000, employing from 500 to 1,000 hands during the packing season. The largest crop in the history of the valley had been grown last year, which should have brought a return of \$7,500,000 at least, but fell short, and the presence of representatives of the shipping houses would, he hoped, be the means of throwing light upon the difficulties encountered.

Report of Committee

Mr. L. Taylor read the following report of the committee appointed at the first meeting:

"The Committee appointed at the last public meeting of fruit and vegetable growers, consisting of L. E. Taylor, Chairman, Gen. Harman, Capt. Bull, A. Lewis, P. A. Lewis, J. E. Taylor, and G. W. Strang, beg to report as follows:

"The Committee have held four meetings, at one of which they met representatives of the local shippers and at another the members of the Traffic & Credit Association at Vernon. In addition, the members have individually been working almost continuously for the past six weeks in gathering information.

"The Committee wish to state clearly at the outset the attitude which they have adopted in their meetings with the shippers.

"That the discussions should be frank and open, and that the shippers should be given the opportunity to state their views on the questions put to them.

"That the duty of the Committee was to obtain information to place before the growers without themselves passing judgment on the same.

"That information regarding the irregular practices connected with marketing last season's crop was to be a recurrence of such practices rather than to take up past troubles.

"That every endeavour should be made to prevent discord between the members of the Traffic & Credit Association, and that the Committee consider the existence of such an association to be necessary.

"That a better understanding should be created between the shippers and the growers, and that the growers should be taken more into the confidence of the shippers.

"That changed conditions of marketing fruit and vegetables have made it necessary that the growers should take a greater personal interest in the marketing end than he has done in the past, when most of the fruit was bought outright by the independent shippers.

"The meeting with the Traffic & Credit Association was attended by about sixty shippers and their representatives, in addition to several invited guests. Proceedings commenced at 2.30 on Wednesday, March 22nd, with Mr. Doberer, President of the Association, in the chair, and continued until midnight with a short interval for supper, when an adjournment was made until the following morning at 9.30, this session lasting until the departure of the train at 12.30 p.m.

"It was definitely stated at the outset of the meeting that the Committee had come to discuss particularly the resolutions passed at the growers' meeting, but that, if the shippers wished to discuss amongst themselves the questions, the Committee would be very willing to lend their assistance in elucidating the case, but it would have to be understood that this would not preclude discussion of the questions at the growers' meeting.

## RUTLAND

Mr. and Mrs. W. R. Reed and family have moved to Glenmore, where Mr. Reed will again take charge of the Glenmore irrigation system for the summer. Their residence here will be occupied during their absence by Mr. and Mrs. H. Gill.

Miss Olive Stafford, who recently returned from Vancouver, where she has been attending a business college, has received the appointment of stenographer to Mr. Beale, in the B.M.I.D. office.

Messrs. W. Money, J. Money, G. Trask and W. Perry are down from the Monashee district for a few days' visit.

Although the continued wet weather has delayed the work upon the land, construction work has commenced on the B.M.I.D. system. A small gang of men have begun work on the lower bench, while a camp is in process of formation on the upper bench.

The extreme depth of the frost this last winter is having the effect of making the various perennial mud-holes in the local roads, much worse than usual, notably in front of the Methodist parsonage, where the road had become little better than a bog. Assisting cars out of the mire had become almost an hourly pastime (!) for residents in the vicinity.

The Ladies Aid of the Mountview Church held a meeting at the home of Mrs. A. L. Cross on Friday afternoon last. The occasion was the election of officers for the ensuing year. This was accomplished in a very simple manner, all the previous year's officers being unanimously re-elected.

The officers are: Pres., Mrs. J. F. Guest; Vice-Pres., Mrs. W. McDonald; Secy., Mrs. E. Towers; Treas., Mrs. T. Cooper. Arrangements for the forthcoming Church Banquet were made, and the conclusion of the business afternoon tea was served by the hostesses.

## AGRICULTURAL SOCIETY WANTS CIVIC AID

Grant of \$1,500 Is Requested To Build Stock Barn

All the members of the Council were present at the meeting on Monday night.

Messrs. S. T. Elliott, President, and H. G. M. Wilson, Secretary, waited upon the Council as a deputation from the Kelowna Agricultural Society to ask for aid in extending the accommodation for live stock at the Fair.

In presenting their case, Mr. Elliott said the budget of the Society for this year comprised expenditure estimated at \$10,700, against which receipts of \$8,870 were expected, but the budget did not include what was absolutely necessary in the form of better accommodation for live stock. The present sheds had been patched again and again until they were ready to fall down, and they were only a quarter large enough. He had made a trip to Victoria in an effort to obtain a government grant for a new barn but had met with a turn-down. At a recent meeting of the Directors it had been decided to ask the Council for assistance to build a stock barn measuring 180 ft. x 28 ft., which would cost, using what lumber was available from the old structures, about \$1,500, and would hold about one hundred head of stock. This building was absolutely essential to the success of the Fair.

An addition to the grand stand had also to be provided and improvements to the main buildings and to the grounds would be required, but the Society would undertake these matters without help. If the Council would provide for the cost of the barn, it would be a great help to the town and district. The Fair was a great advertisement for Kelowna and it was hoped to attract more people this year by making the Fair bigger and better than ever and devoting

## LARGE NUMBER VIEW WORK OF PUPILS

Interesting Exhibit In Domestic Science And Manual Training Branches

On Tuesday afternoon, April 11th, a most enjoyable afternoon was spent by the parents and friends of the Domestic Science and Manual Training pupils in the Old School. A beautiful display of the girls' work was artistically arranged in their laboratory, and an equally interesting exhibit of the boys' handiwork was to be seen in their workshop. The sewing exhibit was very prettily decorated with ferns and spring flowers, which added much to the charming appearance.

Between two and three hundred guests were received by Miss King and Mr. Mitchell.

Dainty refreshments were served by the High School Girls, year I. These had been previously prepared by the different Domestic Science Classes.

The afternoon's entertainment was entirely in charge of the girls, and to those officiating much praise is due for the splendid way in which they worked to make the afternoon the delightful success it was.

Much credit is due Miss King and Mr. Mitchell for their capable and untiring efforts.

(Continued on Page 4)

## ADJOURNED SESSION OF GROWERS' EXCHANGE

Business Left Over From Previous Meeting Is Completed

(Contributed)

The adjourned session of the Kelowna Growers' Exchange annual meeting was called to order at 9.30 a.m., on Tuesday, April 4th, in the Storage Building, with about forty present, and, here the meeting had proceeded very far, there was a very good attendance.

The President, Mr. Carruthers, asked Mr. Barrat to again take the chair, as, on account of his own absence from the previous session through illness, he was unable to stay in touch with what had been done as he would like to be. Mr. Barrat then took the chair, and announced that the two remaining items on the Agenda were "Remuneration of Directors," and "New Business," stating that if any members were present who had not been in attendance at the earlier session of the meeting and desired any information with regard to the Balance Sheet which had already been passed, or other matters which had been dealt with, that the Directors or Manager would be pleased to give them the required information, at the conclusion of the meeting, as he thought that, by handling these questions in this way, time would be saved to the majority of the members who had been in attendance at the previous sessions. Some of the members expressed the opinion that the Balance Sheet be opened for discussion again, whereupon the chairman asked for a show of hands and the meeting decided not to reopen the discussion on the Balance Sheet.

Full discussion was then given to "Remuneration of Directors." In response to a question, the chairman stated that, at present, the Directors were paid at the rate of \$3 per meeting, as provided in the old Agricultural Associations Act, in addition to which travelling expenses were paid when incurred by out-of-town trips, and pointed out that, under the present Act, the remuneration could be fixed by the Shareholders in General Meeting. After general discussion resolutions were passed, making the payments \$10 per meeting for Directors and an annual remuneration of \$1,000 to the President, it being brought out in the discussion that the President necessarily put in a lot of his own time on the affairs of the Exchange, to which he should not be expected to do without adequate recompense.

One suggestion put forward was that a Managing Director be appointed at a more substantial salary. This drew forth comments that, instead of cutting down overhead expenses, this plan would only add to them, and that the details of the business should be put in the position of being subservient to another paid Executive. During this discussion, Mr. Barrat pointed out that since he had been selected by the Board to be President, it placed him in a rather delicate position to have to take part in the discussion, but that when the matter was discussed he had no other idea than that Mr. Carruthers would be prepared to carry on as President, and certainly had no idea that he would be called upon to take the office himself. However, since the discussion was taking place and he had been asked to state his position, he must say that he sincerely could not afford to give up the time which this office called for unless he was paid accordingly.

Under the head of "New Business," discussion took place on the packing charge of 65¢ for apples, some members expressing their opinion that this charge was higher than it should be in comparison with charges of independent shippers, whose charge was said to be 65¢ including their selling charge, whereas in the case of the Exchange an additional charge of 9¢ was made by the Okanagan United Growers' Association. The chairman, in replying to this, stated that he personally was satisfied that he was getting a cheaper packing charge than those shipping through the independent houses. In analyzing the Exchange charge of 65¢, he showed that 5¢ of this was accounted for by a surplus shown on the Balance Sheet and placed in reserve for Working Capital, which it was most necessary to provide and which could be provided for in no other way. Apart from this, the many extra services rendered to him, as a grower, more than accounted for the remaining difference. The saving in time made by the growers' teamsters, during the harvest season running into several hours each day, was in itself, in his opinion, worth at least 5¢ per box to the grower. Also, the Exchange had provided facilities for handling the increasing crops to an extent that none of the independent shippers had attempted to do, this amounted to crop insurance to the grower, and was paid for. He asked the question as to how the 1921 crop would have been packed, had these facilities not been provided by the Exchange.

In response to a question, the chairman stated that it was impossible to say, at this time, what the charges would be for the coming season, but that with the decrease in cost of material and labour, undoubtedly charges would be lower, pointing out that in 1921 the charges had been reduced as compared with 1920. In the discussion it was brought out that the lower charge made by the Vernon Fruit Union was accounted for largely by a much heavier volume handled by them. In dealing with this question

### OKANAGAN COW-TESTING ASSOCIATION

Butter-Fat Results For March

The following is a list of cows in the Okanagan Cow-Testing Association that gave 50 lbs. or more of butter-fat for the month of March, 1922. The name of the cow is given first, then breed, lbs. of milk, lbs. of butter-fat and name of owner.  
1. Whitesox, Guernsey Grade, 1,577, 83.5; A. W. Cooke.  
2. Kate, Holstein, 2,238, 80.5; F. J. Day.  
3. Jessie, Holstein Grade, 1,215, 64.3; C. E. Lewis.  
4. Bonny, Holstein, 1,630, 61.9; L. N. Marshall.  
5. Minnie, Holstein, 1,377, 61.9; W. R. Barlee.  
6. Dorothy, Red Poll, 1,435, 61.7; C. E. Lewis.  
7. Violet, Holstein Grade, 1,419, 56.7; W. R. Barlee.  
8. Upton, Holstein, 1,698, 56.0; J. Spall.  
9. Blossom, Jersey Holstein, 882, 53.8; J. G. French.  
10. Bella, Holstein Grade, 1,373, 53.5; F. J. Day.  
11. Strawberry, Holstein Grade, 1,478, 50.2; J. Spall.  
12. 2-Yr. Old Glass, 40 lbs. 49.8; J. Spall.  
1. Cherry, Holstein Grade, 1,246, 41.3; J. Spall.

### SPRAYING NOTES

(Experimental Farms Note)

With the prospect of the new Fruit Marks Act regulations coming into effect this season, the question of finish and quality in fruit is one which should more than ever attract the attention of growers. The new regulations, which are much more specific in their statements of what constitutes blemishes for the higher grades than the act now in force, make it extremely desirable that the sprays to be used should be carefully selected.

The wholesale use of Bordeaux mixture, accompanied as it generally is by lack of finish and often by an actual russetting of the fruit, should be practiced with extreme caution. Russetting may now be responsible for as high a percentage of loss in the highest grade (extra fancy) as a moderate infestation of scab. Whereas Bordeaux is responsible for much russetting of the fruit, it is likewise admitted that lime-sulphur is capable of actually improving the finish of the product and is in addition an efficient fungicide.

As the russetting is naturally caused by these sprays given after the bloom has fallen, the use of Bordeaux previous to that stage may be advocated where deemed advisable. Undoubtedly the greater danger in respect to russetting is the newer recommendations of 3-10-40, 4-8-40, etc., and the latter formulae should be used in preference to the older one. Taking into consideration control of scab, finish of fruit and quality, in short the pack-out, the following recommendations for orchard use would seem to be the most commendable:

1st spray—either Bordeaux or lime sulphur.  
2nd spray—either Bordeaux or lime sulphur.  
3rd spray—lime sulphur.

4th spray—lime sulphur.  
The absolute necessity of applying three or more sprays should be understood. Trees not sprayed, or poorly sprayed, will not only produce poor quality of fruit and less of it, but, on account of foliage injury brought on by fungous diseases as well as insect pests, are in no condition to form a crop of fruit buds for the succeeding year.

In order to determine possible reduction of crop by the use of spray mixtures, an actual count of some thousands of bloom was made last season at the Central Experimental Farm and the following results noted:

Where lime sulphur, specific gravity .007, was used, 17.4% of the blooms set fruit. Where Bordeaux, 3-10-40 formula was used, 17.7% of the blooms set fruit. There was practically no difference in the set of the two plots due to the spray used.

These results do not indicate a loss due to the use of lime sulphur as a spray for orchard use in the Province of Ontario.

**Calcium Arsenate for Potatoes**  
With the advent of calcium arsenate as an insecticide it should, on account of its cheapness and insecticide properties, displace the use of Paris green on potatoes, which is always liable to be attended by foliage injury. For the control of fungous diseases of potatoes, Bordeaux mixture of the 4-4-40 formula is to be highly commended. Lime sulphur should be avoided. As an insecticide, to be combined with the Bordeaux, use one to one and one-half pounds dry arsenate of lime to every forty gallons of the spray mixture. This combination has proved on the Experimental Farms to be a thoroughly efficient control for blight and potato bugs.

### SPRING MANAGEMENT OF BEES

(Experimental Farms Note)

The main object of spring manipulation is to produce as large a force of bees as possible for the harvest. To secure this force it is essential that the colonies be strong, that the queen be young and prolific and that she have sufficient room for maximum egg production. Also that the bees have an abundance of available stores properly placed within the hive. It is the work of the beekeeper to provide these conditions during the spring.

Bees that have wintered in a cellar should not be placed outside until the first nectar secreting flowers are opened. Colonies showing signs of restlessness and dysentery can often be saved by bringing them out earlier and placing them in packing cases.

To reduce drifting the bees should be brought out during the evening or on a dull day, when there is little chance of flight. The entrances should also be reduced to about one inch; this will help to conserve heat and prevent robbing.

Where the spring is likely to be cold and backward the bees should be given protection when first placed outside. A windbreak should also be provided to protect them from prevailing winds.

On the first warm day when the bees are flying freely, every colony should be examined for stores and queens. Colonies having less than ten or fifteen pounds of stores should be helped from those having a surplus or be given a thick sugar syrup, or better still, combs of honey saved from last year's crop. All weak and queenless colonies or colonies having failing queens should be united. Unite weak to colonies of medium strength or weak queenright colonies to strong queenless colonies. If the hives are badly spotted with dysentery and contain many dead bees they can be cleaned out somewhat but it is advisable to make this first examination brief unless the weather is exceptionally warm.

Be sure there are plenty of stores in the hives at all times and that the queen has sufficient room for brood rearing; add empty combs as rapidly as the colonies become strong enough to require them. Water is essential for brood rearing in the spring. If no water is near the apiary a watering place should be provided in some sheltered place where it is easily accessible to the bees.

Do not attempt to equalize brood until the colonies are in such condition to take care of it. Spreading brood should be avoided as it may result in

### THE STORY OF

## "THE GONDOLIERS"

Synopsis Of Opera To Be Presented  
By Kelowna Theatrical Society

Under the azure blue of a Venetian sky the curtain rises to find a bevy of beautiful "Contadine" twining roses for their lovers.

These happy girls await the coming of the Gondoliers and especially Marco and Giuseppe, who are today to choose their brides. Upon the arrival of these two fortunate men, they are overladen with roses twined so gracefully by their admirers, and each girl vies for first place. The Gondoliers explain to the Contadine their calling and how difficult it is to choose two from out of so many pretty girls; so they propose to let Fate decide by having the girls blindfold them, agreeing to marry the two they catch. Giannetta and Tessa are the lucky ones, so away they go to the church to be married. While they are away, the noble Duke of Plaza Toro and suite, accompanied by the Duchess and their daughter, arrive at the steps of the Grand Canal in search of Don Alhambra, the Grand Inquisitor of Spain, who has come ahead of them to find the whereabouts of the missing King of Barataria.

Upon the return of the bridal party, they are met by Don Alhambra who wants to know, "Why all this happiness?" Upon being told that the two Gondoliers are sons of Baptista Pallieri and have just been married, he is thunderstruck, for he realizes that these two men are no less than sons of the late King of Barataria, and that one of them, whosoever it is, is the reigning monarch. As they don't know who is who, it is arranged that the brothers reign jointly until such time as the old nurse is discovered who can identify the real monarch. In the meantime, the two monarchs with their fellow gondoliers go to Barataria Court to take up the reins of office.

The second act opens at the Palace. The Kings are dressed as become their station but they are very much out of their line, so they have remodelled the monarchy on republican principles and just the opposite to what one would expect in a King's palace takes place.

After three months the brothers are followed by all the Contadine and, to celebrate, the Kings give a dance. During the dancing of the old Spanish dance, "The Cachucha," Don Alhambra appears and is very disgusted at cooks dancing in the Royal apartments.

The Duke and Duchess, now wealthy, arrive at the palace with their daughter who, it is supposed, is to be married to one of the Kings. The Duke is surprised at the undignified reception he gets, so he proceeds to instruct the Kings in deportment and teaches them the gavotte, which, in the end, they manage to perform to the entire satisfaction of the ducal party.

In the meantime, Don Alhambra has discovered the foster mother, now an old witch, whom he brings to court to state who is King. The story she tells is a surprise to all—which ends the play, every one is happy and the curtain falls on the scene with the rightful monarch and his consort crowned.

The opera will be presented by the Kelowna Theatrical Society in the Empress Theatre, on Monday and Tuesday, April 24th and 25th, and at Vernon on Thursday, April 27th.

### G.W.V.A. NOTES

The first of our Sunday Afternoon Musicales proved a greater success than we anticipated. The Club Room was well filled with members and friends and all expressed their pleasure and enjoyment of the programme presented. Orchestral numbers interspersed with songs and a few very fitting remarks by Mayor Sutherland made the hour seem all too short. Being the anniversary of Vimy Ridge, His Worship urged that the celebration of victory events be not confined to jubulations of triumph but rather to a realization of the sacrifices made and the national indebtedness to the dependents and returned ones who are still carrying on in their country's cause.

The Club wishes to extend sincere thanks to all those who so kindly assisted in the programme.

The annual dance given jointly by the Women's Auxiliary and the G.W.V.A. will be held in the Elks' Hall on Easter Monday, the 17th. The veterans 6-piece orchestra will be in attendance and everything points to this being the dance of the season.

General meeting on Saturday, 15th, at 8.30.

chilled brood, which does more harm to the colony than if it were left alone.

Bees wintered outside should not be removed from the cases until they are working well in the first super. The extra protection during the early spring encourages maximum brood production.

As the spring advances the brood chamber should be enlarged to provide sufficient room for brood rearing and stores. This can be done either by raising brood from the lower chamber into a super or by giving a second chamber without a queen excluder.

**FRUIT MEETING LASTS ALL DAY**  
(Continued from Page 1)

but he thought he had shown there was a place for the Association as a useful institution.  
The most important thing of all was that the crop should be sold, and he would relate what had happened last year. The 1920 crop, for various reasons, was sold at record prices. In 1921, conditions were very different. Industrial conditions had changed. In the United States five million men were out of employment, live stock was of low value and credit was tight. On the other hand, as spring drew near, the Eastern States were feeding and taking care of thousands of families on the prairies and providing fodder for their animals. The purchasing power of the people there was very low, and essentials must have preference as compared with a non-essential like fruit. The people of the Okanagan were well off as compared with the people of the prairies. Great Britain and the United States: He gave the average prices of apples per box as being: from 1912 to 1915, 90 cents; 1916, \$1.02; 1917, \$1.20; and last year the average was, perhaps, \$1.50.

Big changes took place throughout the year. At first, values were set by Wenatchee, but over there prices change day by day as conditions warrant. In Canada things were quite different, as the market depended largely upon selling in advance. The crop was so large that about half of it had to be exported on a consignment basis. Duties over-ran the estimates. Prices were set originally as high as in 1920, and some of the early shippers were able to sell at these figures but later shippers had to take very low prices. On Wealthy and McIntosh to Canadian markets, shippers got away pretty well.

Referring to the statement in the Committee's report that too much had been made of the depression on the prairies, Mr. Winslow said the prairies took more Macs and Wealthy in 1921 than in any previous year, including 1920, but they did not do so with winter apples. He ascribed the falling off in demand to the depression in wheat prices of nearly 50 per cent in two months, and estimated the loss of purchasing power due to the fall in the price of wheat and oats, at about \$225,000,000.

The situation on the American market was peculiar. Right through to November, U.S. government reports showed only half a crop as compared with 1920. All over the American continent the apples ripened early, and the crop was marketed at an unparalleled rate, with the result that in New York Washington apples dropped \$1.30 a box coincident with heavy shipments. Up to Oct. 1st, more apples were shipped to the U.S. than in the previous year, when there was a heavy crop. When the slump in prices came every one hunted for cover. The threatened railway strike also forced early marketing. There was hope that the market would recover but it did not. The apples did not keep, having matured too early, and 30 per cent of the Wenatchee apples reached the consumer over-ripe.

A reasonably good market was also looked for in Great Britain, where a hot summer was supposed to have cut down the crop, but rain came later and, instead of having an average crop, the Old Country harvested one of the largest crops ever gathered. These apples would not keep, but when they were out of the way carloads of Washington apples via Panama came on the market and depressed prices. On the Canadian prairies, up to Wealthy and Macs, more apples were sold than ever before; from Macs onwards, less than ever before. The prairie market went broke, went paralyzed in every line when wheat broke to \$1.00. Farmers could not pay their debts and could not buy apples. The Committee had said that the farmers were buying apples now although no better off than they were last fall, but there was now a difference in their psychological attitude. Wheat had risen again 30 or 40 cents and their confidence was restored in a measure. Anti-dumping legislation had prevented the prairie situation from becoming much worse. The majority of the members of the Traffic & Credit Association believed in September and October that the prairie markets would be brought back, and there was not a member of the Association who did not export many more cars than he wished in order to support that market, but the movement did not succeed. The prairies got fewer Okanagan apples than they have needed for five years but the market continued to decline until it got to a point where jobbers were refusing cars even on a consignment basis. In his experience, there never had been such a small consumption of winter apples on the prairies as during the past winter. Whether such conditions would occur again, it was impossible to say. All authorities agreed that the price of wheat fell because it was dumped by the farmers on the market regardless of conditions. If the marketing of wheat had been controlled, the price would likely not have dropped below \$1.40. Formation of a Wheat Board, which was under discussion at Ottawa, would be one of the best things that could happen for Okanagan growers, as they were so much interested in marketing wheat as the farmers themselves.

He believed chances were good to have a Wheat Board this year, which would bring about results and provide a better market for fruit.

While the members of the Traffic & Credit Association made sacrifices to support the Canadian market, the independent shippers who were not members of it shipped where they could find a market. When the Association was started in 1919 all the independent shippers were buying the fruit they handled, and hence they stood to benefit directly by any improvements in shipping conditions and freight rates, but the crop was now handled on a commission basis or a fixed charge per box and the benefit of any improvements would go to the grower. He wanted the growers to understand that not all of the shippers had been glad to join the Association, and it had been a hard matter to hold it together.

He had tried to show that the Association was working in the interests of the growers, but the conditions governing the low prices of apples were not within its control. It had been endeavouring for the past three years to cooperate with the jobbers, without success in many things, but the Association three months ago the jobbers had appointed a committee to come to the Okanagan and cooperate with the shippers. (Applause.)

Mr. Doherty followed. He pointed out that the demoralization of the prairie market was due to the inability of consumers to buy fruit, and that the shippers there were probably not realized in the Okanagan. All staple commodities bore a relation to one another, so why should fruit be immune from a condition affecting all other industries, especially when fruit was not an indispensable article of food, but a luxury? The people of the Okanagan were well off as compared with the people of the prairies. Great Britain and the United States: He gave the average prices of apples per box as being: from 1912 to 1915, 90 cents; 1916, \$1.02; 1917, \$1.20; and last year the average was, perhaps, \$1.50.

This last statement was greeted with loud cries of dissent from the audience, and Mr. Doherty explained he did not mean nett return to the grower but the gross return.

Asking if there was any possible remedy for the position of affairs, Mr. Doherty offered the most sensible and practical suggestion of the whole day's proceedings in recommending that the Traffic & Credit Association be made the means of resurrecting the fruit industry through cooperation between the growers, shippers and jobbers. The Association had cooperated already, he said, to the great benefit of the growers, but it had not yet forced the jobbers to cooperate. Shipments must recognize the needs of the growers, but some blame attached to the latter in that they did not take interest to the extent that they could in the affairs of the Association. He urged that the growers should see that the jobbers recognized the needs of the growers, both big and little, and that the Association, that they properly arranged distribution of the crop and then carried out the arrangements. How was this to be done?

He would take the liberty of inviting a deputation from the growers to attend a meeting of the Association with the jobbers on the 18th. At present, the shippers were in a position to take the crop, but some blame attached to the latter in that they did not take interest to the extent that they could in the affairs of the Association. He urged that the growers should see that the jobbers recognized the needs of the growers, both big and little, and that the Association, that they properly arranged distribution of the crop and then carried out the arrangements. How was this to be done?

On the motion of Mr. L. E. Taylor, the meeting adjourned until 1.15 p.m.

**Afternoon Session**  
On resumption of the proceedings, Col. Moodie said that, following what had been heard of the work of the Traffic & Credit Association, he wished to move that the meeting signify its confidence in the Association. The motion was seconded by Mr. Dunwatters and carried unanimously.

Acting upon the suggestion made by Mr. Doherty, Messrs. Taylor and Reckie moved: That a committee of growers be formed, consisting of one representative from each shipping house, as an executive representing this body, and that the Traffic & Credit Association be asked to approve of this executive acting with them and attending their meetings in the interests of the growers.

After some discussion of details of the wording of the motion, it was put and carried.

**Immature Wealthies**  
The substance of Mr. Winslow's lengthy reply to the first question was that he did not know of any shippers who did not instruct their growers to pick their Wealthies earlier than usual, but he pointed out mitigating circumstances such as the unusually rapid maturing of the fruit and a demand from jobbers early in the season for fruit without regard to colour. The loss fell on the trade.

**Over-Ripe Fruit**  
Thirty per cent of the Wenatchee apples reached the consumer in an over-ripe condition, and the whole Pacific North-West had the same experience. Their tank cars had to do with shrinkage, but could be modified and made to give as good results as standard refrigerators. The falling down in Jonathans was apparently due to something in the soil, but the cause was very obscure and would have to be solved. He could not say anything definite as to the cherry shipments. The minimum imposed by the Express Company was high, and some of the cars of cherries went out far too heavily loaded, in which case shrinkage was inevitable. Owing to the canneries not taking cherries this year, their tank cars assembled from all over the Okanagan to make up carloads, which made it impossible to secure uniform conditions of temperature and treatment when loading.

**Cars Sold**  
Answering a question as to number of cars sold, rolled and consigned, Mr. Winslow produced a voluminous statement, from which he gave a summary of figures, of which our reporter caught the totals but accuracy of the details cannot be guaranteed. The figures were approximately—  
Sold in Canada: Sold, 2,532; rolled, 385; consigned, 104. Total, 3,021.  
Exported: Sold, 184; rolled, 832; consigned, 445. Total, 1,459.  
Grand Total, 4,480 cars.

He defined cars "rolled" as cars sent out whose destination was changed after starting, that is, they are sold in transit and diverted to the place where sold, while consigned cars are sent out to a definite consignee.

**Cars To Vancouver**  
The total number of cars of apples shipped to Vancouver last year was 240, of which 150 came from the Okanagan, 140 of them from members of the Traffic & Credit Association and 10 from other shippers.

**Cars To Prairies**  
The total number of cars of apples shipped to the prairies last year from B.C. was 2,550, of which 1,700 came from the Okanagan. In 1920, 1,750 cars were shipped from the Okanagan.

**Storage Warehouses Not Used**  
Mr. Winslow still thought no mistake had been made in not retaining the apple crop in local storage. Judging by their early ripening, the apples were not going to keep. With the collapse of the markets, it was a question of keeping the apples here till spring or of rolling them. In the judgment of the shippers, if the apples were to be kept until spring, they would have to be under artificial refrigeration, which could not be obtained in the valley.

**Jobbers Refused To Stock Up**  
The prairie jobbers refused to stock up because they could not see any money in it.

**Antagonism Between Jobbers**  
Mr. Winslow thought there was more fighting than usual last season between the prairie jobbers, but shippers were of the opinion that the relations between the jobbers were about the same as usual. A period of declining markets was always one of bitterness, with competition between the jobbers for the business of the retailers.

**Storage Again**  
Mr. Taylor considered the question regarding non use of local storage had not been satisfactorily answered, and he wanted to know why apples had been rushed upon the market in October instead of being held until later in storage.

Mr. Winslow replied that the shippers had tried to get returns on the fruit and things cleaned up. (Laughter.)

Mr. Taylor pressed for an explanation of how the shippers knew in October that the apples would not keep until December.

Mr. Winslow replied that they judged by the premature ripening of the fruit. In his opinion it would not be necessary in an ordinary season to keep Okanagan apples under ice. He asked if the growers figured in October that their apples were going to hold as well as usual, and was greeted with opposing cries of "Yes" and "No."

Mr. Coe said he had Wagners and Newtown in his cellar that, although windfalls, were perfectly good now. Mr. Godwin also stated that he had stored 600 boxes of apples which might be described as windfalls. They might keep, but he had not stored them ago and shipped on Monday, and the Jonathan, Newtown and Delicious were all good. He kept the apples at a temperature of 33. There had been knocking of local storage, but his experiment went to show that it was not.

Mr. Taylor said the point was that when picking the apple crop the prices were rotten, and would it not have been the right thing to do to store the fruit and take a chance that prices would improve later on?

## Fumerton's Easter Outfits From Your Hat Down

## "Millinery for Easter"

A Splendid Showing of Ready-to-Wear Hats at Very Moderate Prices. You will find us ready this week with just the Hat you want.

There is no entrance fee. 34-1c

Mr. Greenside was a passenger to Vancouver yesterday.

Miss Evelyn Carruthers, of Ottawa, Ont., is the guest of her aunt, Mrs. W. J. Holmes. Miss Carruthers is a graduate of Ottawa General Hospital and is on her way home, after spending the past two years nursing in Honolulu.

A fire alarm at 3 p.m. on Monday brought the boys of the Brigade to the Fire Hall at a 2.20 clip, but they did not have to take out the trucks, the blaze in some rubbish back of the new stores on Bernard Avenue belonging to Mr. J. Harris, being subdued immediately after the alarm was turned in, and the call was cancelled.

Alarms are more frequent at night than during business hours, and shoppers had an exceptional opportunity to see how quickly the members of the Brigade can reach the Fire Hall.

## MARRIAGE

Cass-Dickson

A quiet wedding was solemnized at the Parsonage by Rev. E. D. Braden on Tuesday morning, at 8 o'clock, when Miss Margaret Dickson and Mr. T. C. Cass, both of Kelowna district, were united in the bonds of matrimony. They were attended by Mr. and Mrs. R. K. Smith. The happy couple left by the morning boat for a honeymoon at the Coast.

## Local and Personal

Mr. Dan Curell went to Vancouver on Tuesday on a business trip.

Mr. McKee and family left for Brandon, Man., on Tuesday.

Mrs. Thos. Fletcher went to Lyleton, Man., on Thursday.

Mr. P. Casorso left on Friday for a visit to Vancouver.

Mrs. J. W. N. Shepherd returned on Friday from a visit to relatives at Victoria.

Messrs. B. McDonald and A. W. Hamilton returned from the Coast on Monday.

Mr. Joe Harwood, of Vernon, was a visitor to Westbank and Kelowna on Monday and Tuesday.

Mr. F. Robbins went to Enderby on Tuesday to visit a brother residing in that district.

Mr. W. Morris, auditor for the Workmen's Compensation Board, went to Vernon on Tuesday, having completed his work in Kelowna.

Miss Tena McMillan arrived on Tuesday from Spokane to spend a couple of weeks' vacation with her parents, Mr. and Mrs. D. McMillan.

Messrs. E. O. MacGinnis and Geo. S. McKenzie went to Penticton on Monday to assist Miss Elsie McDonald in her recital there that night.

Mr. J. M. Davison, C.P.R. agent, made a flying business trip to Vancouver this week, leaving on Monday and returning last night.

Dr. Bryce and family returned on Thursday from the East, where the Doctor completed a specialist's course in diseases of the eye. He has resumed practice in the Willits Block.

Mr. N. B. Lloyd, formerly of Kelowna, has disposed of his orchard at Sorrento, on Shuswap Lake, and has gone to the Coast to look up the suitability of Vancouver Island as a new location.

## FRUIT MEETING LASTS ALL DAY

(Continued from page 4)

Information Regarding Market Each day the Association issued a statement at noon during the shipping season showing the number of cars leaving Vernon that day, destination, contents and information regarding general market conditions. Mr. Winslow also talked with the shipping members daily by phone.

Onions Mr. F. A. Lewis wanted details as to the onion crop.

Mr. Winslow said the Valley had marketed as high as 600 cars when the East and the United States could take them, but this was much above the normal figure. Western Canada bought on the average about 350 cars of onions each fall. The yield in the valley last year was 365 cars, of which about 60 cars were shipped to Ontario and the United States. The opinion of shippers last fall was that the onions would not keep well, and growers seemed generally to share that view. Shippers were not disposed to buy onions to speculate with, when the market was in doubtful condition. It was to hold the market steady that the 60 cars were sold in the East and the States, otherwise the prairie market would have slipped.

Crab Apples Western Canada could take about 120 cars of Transcendent crabs successfully. Shippers rolled about three cars on the Canadian market. The U. S. market for this fruit slumped and afterwards came back again. A production of 180 cars could be sold readily.

The Kootenay Apple Deal On taking up the question of the deal said to have been made by the Growers' Sales Agency for the Kootenay apple crop, Mr. Dunwatters wanted to know why all the questions were being answered by Mr. Winslow instead of the shippers themselves, whom he would like to see on the platform.

Great applause showed that Mr. Dunwatters had interpreted accurately the feeling of the meeting, and on the request of the chairman, a number of officials of shipping firms took seats on the platform, including Capt. Murrie, Messrs. C. L. Lowe, H. A. Kenwick and Ross Morrison, of the Okanagan United Growers and Growers' Sales Agency; Messrs. T. Bulman and B. McDonald, of the B.C. Growers; Mr. L. Hayes, of the Occidental Fruit Co.; Messrs. W. C. Duggan, T. B. Matheson, Geo. Kneveloff and Hill.

The audience tensed with a feeling that the "fun" was about to begin. Mr. Ross Morrison, Calgary Manager of the Growers' Sales Agency, answered the questions regarding the Kootenay apple deal. The apples, 157 cars of winter varieties, were neither bought for cash nor handled on consignment but at a controlled price. He read the contract in relation to the deal and explained it. The deal was not taken up prior to Oct. 8th.

The point was whether the other shippers were informed of the deal, and Mr. Taylor pressed the question, to which Mr. Morrison returned rather a vague answer, stating that the deal had been talked over with Mr. Winslow and he understood the other members of the T. & C. Association knew of it.

Mr. Hayes stated that the Occidental Fruit Co. had no advice of shipments being made under the deal, and Mr. Duggan said the first intimation he had received of it was from a Calgary firm on Oct. 17th. Mr. McDonald was not in a position to say when or how the B.C. Growers learned of the deal. He thought the first information came through wires or correspondence. It did not come from the T. & C. Association.

Mr. Winslow remembered discussing the deal with Mr. Lowe but not with Mr. Morrison. He could not remember the details but he had spoken to several members about it by phone.

(Continued on Page 8)

## AGRICULTURAL SOCIETY WANTS CIVIC AID

(Continued from page 1)

special attention to the district exhibits. The ground filled in last year had sunk and would have to be filled up again, and he suggested that the Public Works department could probably do so with refuse without cost.

Mr. Wilson said all he had to add to Mr. Elliott's statement was that the only criticism he had heard of last year's Fair and sports was the lack of accommodation.

The Mayor expressed the sympathy of the Council with the needs of the Society but said nothing definite could be stated as to how far the City could assist until the estimates were taken up for the current year, in from two to three weeks' time, when the matter would be considered.

Mr. Elliott said the Directors of the Society had profited by last year's experience and could put on a better show this year at less expense. The poultry prize list was to be expanded and that department of the fair made one of great interest. By the attractive features presented, it was hoped to bring people to Kelowna from all over the province. Replying to the Mayor, he did not look for a larger grant from the government, as the total sum appropriated of \$42,000 had to be distributed amongst all the exhibitions in the province.

The deputation then thanked the Council for the hearing accorded and withdrew.

A letter from the Secretary of the Golf Club detailed the terms and conditions upon which the tract of land upon Dillworth Mountain would be sold to the City.

On the suggestion of Ald. Meikle, the letter was laid over for two weeks. Permission was granted to The Jenkins Co., Ltd., to install a gasoline pump on Water St. opposite their new building, provided the customary requirements are complied with.

With regard to the recommendation of the jury at a recent inquest that the Council enact a By-Law prohibiting people from crossing streets diagonally, an opinion was read from the City Solicitors stating that the possibility of the City incurring liability in the event of passage of any such By-Law was extremely remote.

Another opinion from the City Solicitors referred to Section 18 of By-Law 304, which prohibits motor cars from using the sidewalks. They held that if the Council consented to breach of the By-Law by permitting cars to enter garages by crossing sidewalks, the City would be liable to incur damages in the event of an accident occurring through such practice. This led the Mayor to state that steps should be taken to relieve the City of such responsibility, and the matter will have further consideration at a future meeting.

A vigorous written protest was lodged by Mr. J. H. Trenwith against giving an order to the Northern Electric Co. for lamps, when these could be got at the same price locally. He considered that firms doing business in the city and paying taxes and licenses should be given an opportunity to submit prices on any equipment required by the City.

Ald. Adams said he understood that the City could buy to better advantage from a wholesale rather than a retail firm.

It was decided to make enquiry whether, as had been alleged, the City was not getting as good a price as the retailers from wholesale firms.

With regard to the objection made by the Imperial Oil Co. to assessment of their oil tanks here as improvements, the City Solicitors rendered an opinion to the effect that if the tanks were brought here complete and placed on the ground resting on their own weight, they could not be assessed as improvements, but if erected on a concrete base or a scaffolding fixed to the ground, a different consideration would arise.

A long letter from Messrs. Cochrane, Ladner & Kenhard, barristers and solicitors, Vernon, on behalf of Mr. E. Newby, in regard to the buildings on the foreshore lease formerly held from the City by their client jointly with Mr. A. J. Jones, was referred to the City Solicitors.

A translation had been obtained of a lengthy letter in a beautifully-formed German script from a resident of Hunland, enquiring as to prospects should he emigrate to Kelowna, but no enthusiasm was shown by the Council as to acquiring this would-be immigrant and no action was taken towards sending him a reply.

By-Law No. 332, assigning to Mr. W. H. Lloyd-Jones a mortgage given by Mr. I. W. L. Dillworth to the City, was reconsidered, finally passed and adopted.

The Mayor reminded the aldermen that when the Board of Trade had begun the agitation against repeal of the anti-dumping clause, the Council had provided assistance to the extent of about \$200 to send a deputation to Ottawa, and authority to grant this money should be put through.

A resolution was passed accordingly, authorizing payment of a grant of \$200 to the Board.

At the request of the Mayor, the City Clerk read the minutes of the last meeting of the Police Committee as published in our last issue, so that the Council might be informed as to the action taken by the Commissioners regarding definition of police duties and provision of additional "silent" policemen.

Discussing means of collecting licenses, poll and road taxes, now that the Police Commission had relieved the Chief of the work, Ald. Shepherd suggested that collection might be made through the Assessor's office, but some of the aldermen thought the Assessor was kept too busy with his present duties to assume any more, and he would not be in a position to collect the road and poll taxes, which people would not come to his office to pay. Ald. Rattenbury considered that these taxes would have to be gone after and that they could only be collected by the police.

The Mayor was of the opinion that some one could be got to do the collecting on a percentage basis, say ten per cent.

No definite conclusion was arrived at, and the subject will be taken up again.

The matter of providing "silent" policemen at the intersections of Rich-

## Crisp New Gingham are Here

### CASE IS PRESENTED FOR MONEY BY-LAWS

(Continued from Page 1)

light utilities they had been placed in a much better position already, and the improvement would be more marked after the proposed outlays were made. The method of street lighting would be changed to a line of poles on each side of the street with a light on each pole. He regretted that the Inspector of Electrical Energy had forbidden the City to erect poles along the centre of the street, which would be the ideal location and would avoid severe pruning of the shade trees. The next best thing would be to use higher poles with long arms, so as to give better light and at the same time save the trees as much as possible.

Mayor Sutherland, who was next called upon, said that he had such able lieutenants in Aldermen Adams and Barrat that they left him little to say. They had given their best attention to their departments and if the By-Laws were carried, the ratepayers could depend upon them to carry out the work well. The reference to Superintendent Blakeborough had brought to his mind how deeply indebted the City was to ex-Ald. Leckie for his good work in the city in regard to the municipal power plant and the services of the City.

There were three classes of By-Laws, said His Worship: first, those relating to streets, bridges and schools, for which purposes interest and sinking fund must be met entirely out of tax rates; second, local improvements, the whole or part of which was paid by a frontage tax, and third, public utilities, no part of which could be paid out of the taxes on land and improvements.

To this third class, with the exception of the one relating to the purchase of fire-fighting apparatus, belonged all the By-Laws upon which they would vote on Wednesday. The public utilities of the city had always paid for themselves in the past, and the aggregate of the surpluses was decidedly more than the aggregate of the deficits. The improvements now proposed were for the purpose of reducing the overhead expense, just as every corporation had to do. The condition of the electric light plant was such as obtained in every business if it was not touched for a number of years yet was growing. The plant was adequate when it was put in and for some years thereafter, but instead of the two hundred connections in 1908 there were now 750, and the system was still growing. Within the last few years the poles started to rot and some of them had blown down. This was a bad state of affairs and it involved the loss of life, so the time had come to make changes and renewals. The transformers were overloaded for several reasons. One was that in the early years the city was small and could not afford to pay enough for a good electrician, then the war came and many enlisted, then times ensued, property reverted to the City and tax sales were held, and the City was less able than ever to afford a good electrician. Last year, they had been able to get one of the best men in the province and he had been doing his best to improve the condition of affairs. If the line loss could be reduced 15 per cent, a saving of \$3,000 a year could be effected, which would much more than cover the interest and sinking fund on the \$20,000 to be expended. If no attempt was made to remedy the cause of the line loss, it would get worse from year to year.

Turning to the water service part of the proposals, the Mayor pointed out that the installation of electric pumps was required by the replacement of the steam plant by hydro-electric power. These pumps could pump direct into the mains, as at present, or into a reservoir. If they pumped direct, it would mean keeping two men in the Power House all the time, so that installation of a reservoir would mean a saving of \$3,000 in wages on these men alone, which amount would pay interest and sinking fund on \$50,000 worth of debentures. Steam pumps were easily regulated to pump into the mains, but electric pumps were much more sensitive to variations of applied power, and there would be a considerable loss of power if they did not have a reservoir to pump into. The town was very fortunately situated with regard to a reservoir, as its site was flat and none of the buildings were higher than another to any extent. In such towns as Vernon and Kamloops there were residences at very varying heights, which meant strain on the mains at low levels due to the pressure required to force the water to the highest points. The reservoir at Kamloops was at a height of 400 feet. Here, the site in view was 263 feet above lake level. It would cost about 2 1/2 cents to pump 1,000 American gallons into the reservoir, and the Council might be thought to be roguish in charging \$2.10 for what cost ten cents to pump, but the cost of current was by no means the whole thing. Reductions would likely be made in the water rates not on the minimum charge, which would probably remain the same, but on the excess used over 4,000 gallons. If a reservoir could be obtained at the ideal height, 4/10 cents per 1,000 gallons would be saved in pumping, or about \$500 on the quantity pumped last year. A low rate for large quantities of water meant that every one could have fine lawns and gardens. Passage of the By-Laws would enable the City to have lower rates on public utilities, which were higher than they should be, and the reduction would be effected without influencing in any way the taxes on land. It should be remembered too, that all the \$65,000 for improvement of the waterworks might not be required, and the By-Laws would be issued only for the amount needed.

At the conclusion of his remarks the Mayor invited Mr. Leckie to speak. Mr. Leckie said it was questionable whether the City could carry out its contract with the Vancouver Power Co. unless the reservoir was put in as a fairly even load had to be guaranteed instead of pumping against a variable head. As a taxpayer, he was much in favour of the plan of the waterworks and of improving the electric light plant, as the surpluses earned in past years on water and light had had the effect of reducing the taxes on land. The line loss was accounted

for by the fact that the wires were too small and got hot, thus causing a loss three times greater than normal. He suggested that the audience ask questions on any points they might wish to have cleared up, and started the ball rolling by asking Mr. Blakeborough what would be the pressure from a 263-foot head with hose lines delivering 2,000 gallons per minute.

Mr. Blakeborough replied that it would be 90 lbs. To further questions, he replied that the present ordinary pressure was between 60 and 70 lbs., and with the reservoir it would be 114 lbs.

Mr. Ennis wanted to know what shape the pumping plant was in, as he had heard that it required a lot of money to put it in good order.

The Mayor replied that the plant was in fairly good shape but the town had outgrown it. The pump installed in 1909 was a nice little piece of machinery, while the large underwriters' pump, installed to cover fire emergencies, was very wasteful of steam but it was necessary to run it also in the summer time to meet the demands for water for lawns and gardens. If the present system was continued, the City would have to carry on with the present staff and a new pump would have to be purchased.

Mr. Ennis said he had held for years back that the power plant was very expensive and where would we have been but for the fuel obtained from the saw mill?

In the early days, replied His Worship, the fuel from the mill met the City's requirements almost wholly, and in 1914 the fuel bill was only \$5,000, but the city had grown to such an extent that it was necessary to purchase a large quantity of extra fuel, and the bill last year totalled \$21,000.

Mr. D. McMillan enquired if there was not danger of bursting the pipes by such high pressure from the reservoir, unless there was means of reducing it.

Mr. Blakeborough replied that the pipes had to stand a fire pressure of 120 lbs., under present conditions, while the reservoir pressure would be 114 lbs. In the part of Vernon the pressure was 140 lbs.

In the lower portion of Kamloops, added the Mayor, the pressure was 130 lbs.

Mr. A. Hardy complained that taxes were too high. He was a poor man but had to pay \$160 a year in taxes, which he could not increase. He said as he was a farmer and did not turn his money over twelve times a year like some of the business men. (Laughter.)

Mr. Leckie heartily wished that he could turn his money over twelve times a year. Passage of the By-Laws would not increase Mr. Hardy's taxes, as the consumers of light and water would pay for these utilities.

Mr. J. D. Pettigrew, Chief of the Fire Brigade, said the Brigade had followed with close interest the proposals of the Council to improve the municipal light and water services, which they heartily supported, and he hoped every one would turn out to vote in favour of the By-Laws. He moved that the meeting endorse the By-Laws and thank the Council for putting them before the people.

In seconding the motion, Mr. R. C. H. Mathie said the reason why so few wished to speak that evening was because there was no argument against the proposals, and he voiced his entire confidence in the present Council to do what was in the best interests of the community.

The motion was carried without opposition and applause.

The chairman invited Chief Pettigrew to speak on the needs of a new fire truck.

The Chief said he had not come prepared to speak as he thought Ald. Shepherd, Chairman of the Fire Protection Committee, would deal with the subject, but he might say that the necessity of a new truck was beyond doubt. On nearly every occasion that the Brigade turned out during the past three years there had been trouble with the truck now in use. The matter had been brought up repeatedly before the Council but had been turned down for lack of money. The truck which it was now proposed to purchase through an issue of debentures was to cost about \$1,000 less than the Brigade had estimated would be required, so it could be seen that the Brigade had done their best to set the value of the truck at the lowest possible figure, and the City would not be stuck for any more than it should pay. The Brigade was not asking for any more equipment than was absolutely needed.

Mr. Leckie said the Fire Brigade was a very efficient one, and it was the duty of the City to supply them with all necessary equipment. The Brigade had saved the city over and over again from disaster, and the least that could be done was to give them as efficient equipment as possible.

The Mayor explained that the By-Laws had to cover the cost of a siren as well as a truck, as the present steam siren could not be used after the hydro-electric power was installed. The truck and siren would be obtained whether the By-Laws were passed or not, as they were absolutely necessary. This was the reason for submitting the proposals so early in the year, in order that when they were defeated, the tax rate would be placed at a figure to provide them out of current revenue.

Mrs. Calder enquired if the same emergency pressure could be obtained under a reservoir system as at present with the pumps, to which the Mayor replied that, in the event of a small fire, the reservoir supply would cope with it, but if the fire was a big one, the pumps could be started and water pumped directly into the mains under fire pressure as at present.

Mr. P. Clement wanted to know if the drinking water would be warmer from a reservoir supply.

Mr. Leckie replied that reservoir water would undoubtedly be warmer in summer, but there was the saving factor that the constant use of water for irrigation would entail more frequent pumping and would keep the water fresh.

The meeting then adjourned.

### FAMOUS CHARACTERS ON THE SCREEN

Fanny Hurst's Heart-Interest Stories Are Picturized

When Fanny Hurst first took up her pen and started writing her inimitable heart-interest stories, she never dreamed that her true-to-life characters, which gained her fame in fiction, would some day be immortalized on the screen. She wrote for the sheer love of writing life as she saw it, not as a playwright or dramatist but as a realist. She did not write with the stage or screen as the object of her writings; and so it was a distinct surprise to her when one day she was approached by a producer who had read her story, "Humoresque," and who told her that he thought it would make a great screen drama.

He purchased the screen rights and the rest is history. "Humoresque," Fanny Hurst's first tale to be picturized, has gone down in film annals as one of the greatest dramatic productions ever screened. And now comes "Stardust."

The motion picture "Stardust," suggested by Miss Hurst's novel of the same name, is adapted for the screen by Anthony Paul Kelly, is now a finished product with charming Hope Hampton in the starring role. It will be the first National attraction at the Empress Theatre on Friday and Saturday.

Not only is "Stardust" a living, vital thing on the screen today, but it is also to be dramatized for the stage. As a motion picture production, it is said to equal if not surpass the great "Humoresque."

How can Fanny Hurst's dramatic success be accounted for in view of the fact that in neither the case of "Humoresque" nor "Stardust" did she write directly for the stage or screen? Sceptics have pondered over this question, but it automatically answers itself when it is considered that she was writing only for the sheer love of writing of life as she saw it. In short, without perhaps suspecting it, she was writing the drama that which there is no greater—the drama of life.

Before her advent into fiction, Fanny Hurst was a newspaper woman. She had few equals and no superiors. She wrote warm, heart-interest stories, then of everyday events, based on her contact with humanity in all walks of life, and she carried this same gift of human understanding into her more recent literary efforts for the magazine and book publishers.

Her "Stardust" first ran serially in the magazine, then it was published as a novel in book form, in which it enjoys tremendous popularity. In the film production, "Stardust," Hope Hampton is supported by an admirable cast, headed by James Renne and including Edna Ross, Thomas Maguire, Mary Roy, Charles Musset, Vivian Ogden, Ashley Buck, Noel Tearle, George Humbert, Gladys Wilson and Charles Wellesley. Hobart Henley is the director.

### ADJOURNED SESSION OF GROWERS' EXCHANGE

(Continued from page 1)

tion, the Manager pointed out that the Exchange possibly had a good many items to take care of which did not have to be considered by others. Lack of working capital made it necessary to obtain large advances from the bank, entailing heavy interest charges, and also, prevented taking full advantage of trade discounts, which, on our large purchases, would amount to considerably over a year's operations, and he enumerated other items which brought the comparison of the packing charge to within 2 or 3 cents of the Vernon charges.

At this point Mr. Carruthers gave a short resume of the Okanagan United Growers' annual meeting and read the Resolutions passed. The chairman then stated that the recommendations put forward at the previous session of the meeting with reference to the 5-year contract had been taken up at the annual meeting of the Okanagan United Growers and agreed upon, and that letters were now being mailed to growers by the Exchange, giving those who had signed the 5-year contract under a misapprehension, the option of reverting to the one-year contract, also to those who had cancelled their existing contract under the impression that only 5-year contracts would be in force, giving them the opportunity of reinstating their original contracts. Mr. Barnes stated that although the Vernon District had not yet been canvassed on the 5-year contract, the principle had been endorsed over and over again by the growers in that District. He also stated in reply to a question, that he had interviewed officials in the Head Offices of the Banks, both in Montreal and Toronto, who had expressed their strong opinion that the adoption of the 5-year contract would vastly improve the credit of the growers.

The Chairman asked the meeting whether the resolution passed at the last annual general meeting, instructing the Exchange to take out membership in the B.C.F.G.A. and pay the fee of \$1.00 out of each grower's crop returns, was intended to be acted upon for the coming season, whereupon a similar resolution was moved and carried for this year.

A resolution was then passed instructing the management of the Exchange to render final account sales to growers as soon as completed, regardless of whether cheques were sent or not, and to the daily sales report received from the Central office, and the Manager stated that the information given on these sheets would mean nothing to the grower, since they often covered sales on shipments made earlier in the season and would therefore not be indicative of the day's market prices, which, in seasons such as the last, are subject to rapid fluctuation, particularly on the earlier varieties of fruit, and that these sales reports would have no relation to the closing pool price.

In answer to a suggestion that the working methods of the O.U.G. Trade Products, Ltd. be looked into, the chairman replied that this matter was already in hand and that a committee had been appointed by the Okanagan United Growers for the purpose.

In discussing the matter of culling, it was brought out that the fact that the Exchange packed No. 3 Grade last year would account for a large percentage of culls, but, under the new grading rules to come into force the coming season, the "C" grade would take care of a large percentage of apples which last year had gone into the cull box. Some of the members were of the opinion that the culling had been too severe, to which the Manager replied that blemishes would be overlooked by the grower at time of picking would be shown up on the sorting table, and that certain blemishes, such as the stings of the Bud Moth, might easily be overlooked when the bloom was still on the fruit, but that it was the duty of the sorter to detect these blemishes and to grade accordingly.

The Manager also stated that he made a practice of making frequent personal inspection of the cull boxes through the packing season, and that he had failed to find occasion for criticism on the way the work was being done. He suggested that the packing house was open to the growers through the packing season and if any grower thought he had occasion for complaint, he was always willing to make an inspection in company with the grower and remedy any matters which might be found out of order, and he could not recall an instance where a grower had brought such matters to his attention without being able to satisfy him.

The following figures were quoted from the Okanagan United Growers' annual report, showing that a greater percentage of No. 1s had been packed by the Exchange than at any other point in the Valley:

Local	Percentage
Kelowna	81.1
Walbachin	78.8
Peachland	71.9
Penticton	70.0
Summerland	69.0
Vernon	61.4
Grand Forks	61.9
Enderby	21.5
Armstrong	16.5

Mr. Price then put forward the following resolution dealing with the handling of vegetables:—

"WHEREAS at the present time there are no established grades for the commercial pack of potatoes or onions in Canada, and

"WHEREAS the competition met with by the Canadian grower is largely from the United States, where a standard system of grading is in force, and

"WHEREAS this lack of grading on the part of the Canadian grower results in the selling of their product at a lower price than would be indicated by their value in relation to the American product:

"BE IT RESOLVED that the Dominion Government be urged to enact legislation along the lines of the proposed bill for the marketing and grading of potatoes and onions prepared in 1919, making such marking and

grading of these products compulsory where such products are to be placed on the market:

"And that copies of this resolution be sent to the Minister of Agriculture of the Dominion of Canada, Mr. C. W. Baxter, Fruit Commissioner, Ottawa, Mr. R. G. L. Clarke, Dominion Fruit Inspector; also, to all associations of growers producing potatoes or onions in Canada, asking for their assistance and influence in bringing about the necessary legislation."

In support of this resolution, Mr. Price read extracts from letters received by the Exchange from the Vancouver office of the Okanagan United Growers dealing with the necessity of improving the grade of our vegetables, especially potatoes, if we were to have any place at all on the Coast market. The resolution was carried unanimously.

At the request of members, the chairman again asked the meeting to instruct him by vote as to whether the Balance Sheet should be re-opened for discussion, and the meeting decided in the affirmative and, after the adjournment for lunch, this matter was again taken up.

In answer to a question as to how box shock orders were placed, the manager stated that this material was practically all ordered through the Okanagan United Growers, and in the case of 1921, requisitions to all the Locals were turned in by the O.U.G. to the B.C. Traffic and Credit Association, who bought for practically the entire Valley, and, by their increased buying power, were able to make very considerable savings on purchases. Answering a question as to the amount of the inventory carried over in the Box Account, the Manager stated that this was only half of the amount carried over in inventory the previous year, and only about the normal carry-over for shipping concerns handling a volume approaching our own, but that this amount would have been less, had it not been for the big windstorm last season which considerably reduced our pack on certain winter varieties.

Questions regarding banking arrangements were then asked and answered satisfactorily by the chairman and Manager.

The Manager also explained in detail various items shown in the Trading and Profit and Loss accounts, and Mr. C. H. Jackson, the Auditor, gave information of the Government loan and the method of repayment of same.

General Harman then thanked the chairman for re-opening the discussion on the Balance Sheet and expressed his pleasure at the answers given. Capt. Houlton also rose and thanked the chairman, expressing every confidence in the Board of Directors.

A discussion ensued as to the advisability of weighing all fruit as received. In speaking on this, the Manager stated that at present all cherries were weighed, but, in his opinion, the cost of installing wagon scales at each receiving door, and also in the outside houses, which would be necessary if all fruit were weighed, would not be justified by results, and the big saving to growers in quick unloading under the present system would more than offset the satisfaction which growers might have if the fruit were weighed. He also pointed out that in Vernon, where the volume handled is about twice that of the Exchange, the same system of receiving is used as in Kelowna. After free discussion from all angles, the meeting decided in favour of carrying on under the present system.

The item of cost of telegrams in the Okanagan United Growers' Balance Sheet was questioned. Mr. Lowe stated that his item covered not only the expense of the Vernon office for telegrams, but of the other eight branch offices as well. These offices handling a great volume of business in addition to that of the Okanagan United Growers, that all of the items of expense shown in the Okanagan United Growers' Balance Sheet were taken care of in the selling charge of 9 1/2c per box, and that this charge was less than the average selling charge of the larger selling organizations of the United States, which averaged about 12c to 15c per box on apples.

Mr. Lowe read a telegram he had received in the morning from Mr. C. W. Baxter, Dominion Fruit Commissioner, at Ottawa, as follows:—  
"English apple production last year approximately 504,000 Canadian tons. Our commercial production 270,000 Canadian tons."

This telegram confirmed the figures given in the meeting by Mr. Lowe at the first session of the meeting on March 25th, which Mr. Lowe understood some growers had questioned.

The Manager then read the resolution passed at the annual meeting of the B.C. Traffic and Credit Association in regard to completion of the C.N.R. Kamloops-Kelowna branch which was published in our issue of March 30th.

Mr. Grote Stirling put forward a resolution along similar lines which was unanimously carried. The resolution was as follows:—

"WHEREAS the Kelowna-Kamloops Branch of the C.N.R. is still awaiting completion, and

"WHEREAS money is locked up in

### Notice

Thirty-six years ago I helped shoe horses at the price of \$2.50 & \$3.00 each, and to give the public a good start for their spring work will do it again for the month of April. Iron also is down.

the right-of-way, fencing and grade; and

"WHEREAS growers have entered into arrangements in the expectation of the use of the railway passing through their properties; and

"WHEREAS the most important factor in the sale of our produce is widest distribution, this link with the Main Line of the C.N.R. will give distribution through the Northern Provinces; and

"WHEREAS the revenue obtainable from this branch line will make a considerable contribution to the reduction to the National Railway deficit;

"THEREFORE BE IT RESOLVED that this annual meeting of the Kelowna Growers' Exchange urges on the attention of the Hon. the Minister of Railways the necessity for the completion of the Kelowna-Kamloops line in time to handle the 1922 crop."

A resolution was then carried that the Exchange arrange to have a half-yearly meeting of Shareholders.

A hearty vote of thanks was proposed to the retiring President, Mr. E. M. Carruthers, for his valued services to the Exchange during the past several years. This motion was unanimously carried with applause, which was acknowledged by Mr. Carruthers, who stated that, although he would not be in the chair the coming year, the interests of the Exchange would still be uppermost in his mind.

A hearty vote of thanks was then voted to the Manager and Staff for their work during the past year. The Manager thanked the meeting for this expression and assured the members that not only himself but the Secretary and every member of the Staff would put forth their best efforts in conducting the business of the Exchange in the future as in the past.

On motion, the meeting adjourned at 4.30 p.m.

## "Shop Around"

Is a famous American's advice to the buying public of today. He says further, "the great mass of people should examine the market and determine for themselves where they can most profitably spend their dollar. . . . Do not buy except for values; there are plenty of them on the market. . . . Go out and look for them. . . . Shop around."

We Invite Inspection of Our Stock.

**FRUIT MEETING  
LASTS ALL DAY**  
(Continued from page 5)

Mr. Taylor said the chief point was that the apples were sold at \$1.75 in the Kootenay, and when it was asked why they were sold below the fixed control price of \$2.10, the reply was given that other shippers had sold below \$2.10. The Committee had gone through the books of the other shippers and could not find that they had done so.

Mr. Morrison reiterated that the "famous" Kootenay deal had not been consummated until Oct. 8th, prior to which date other Okanagan shippers had offered apples at prices lower than the Kootenay apples.

Mr. Taylor wanted specific cases quoted instead of generalities.

Then the thunder clouds began to gather. Mr. Lowe somewhat heatedly objected to Mr. Taylor's line of questioning, but Mr. Reekie elicited loud applause by stating that Mr. Taylor, as chairman of the Growers' Committee, was quite justified in asking for information of a definite character.

After making further anonymous references, Mr. Morrison finally yielded to pressure and quoted Mr. Jamieson, of the United Grain Growers, as stating between Sept. 22nd and 26th that he had received a telegram from the B.C. Growers offering apples on consignment, and his firm was therefore not handling apples.

Mr. Taylor asked what Mr. Morrison had to say about a car of fruit sent by the O.U.G. to Saskatoon on Sept. 15, to Crawford, Ltd., in which Wealthies, No. 1's, No. 2's and crates all sold at the same price, \$1.00. He had seen the sales note.

Mr. Morrison absolutely denied that should not fetch as much as the

truth of the charge, but further talk on the matter was interrupted by Mr. McDonald giving his side of the transactions with the United Grain Growers. He read copies of telegrams which had passed beginning with Aug. 23rd, when the purchasing agent of the U.G.G. wired that they would not consider buying apples except on consignment. The B.C. Growers replied the following day that the price was \$2.10, but if consignments of apples were made, the U.G.G. would be given first consideration. A further wire was sent on Sept. 12, stating that the B.C. Growers would be prepared to negotiate a deal to the satisfaction of both parties, no mention being made of consignment. To this a reply was received that the U.G.G. would not be handling any apples that season.

Mr. Bulman said that, while the control price was \$2.10, his firm wanted to dispose of, but they had made no promise, and they intended to deal fairly with their fellow shippers and the growers. On the other hand, the Kootenay deal did interfere with the price of apples in Western Canada. Mistakes were made last year, and he regretted that many men did not seem big enough to admit having made them.

Mr. McDonald stated that Mr. Jamieson had informed him that while the B.C. Growers were trying to induce him to buy at the standard price, he had received offers from five firms in B.C. to sell apples on consignment.

Capt. Mutrie pointed out that the Kootenay fruit had been sold on a controlled price and not on consignment. There was no storage in Kootenay and the fruit had to go to market at that time of year. The Kootenay pack had not reached the standard of the Okanagan, and it was natural that

Okanagan product. He held that the letter read by Mr. McDonald showed that fruit was sold on consignment two or three weeks before Oct. 8th, the date of the Kootenay deal.

Mr. Taylor said the Committee had taken particular trouble to go through the details of the Kootenay deal. They had examined the books of the B.C. Growers, Duggan & Davies and parties, those of the Occidental Fruit Co., and had found that on Oct. 8th the B.C. Growers had shipped out mixed winter, 1's and 2's, at \$2.10. On Oct. 10th another car was sent out at control price and was refused. On Oct. 11th the Occidental sent out a car at \$2.25 which came in contact with the Kootenay deal and rebates had to be made.

Mr. Bulman had no desire to make this matter public but he had to do so in self-defence, and he was putting a letter dated Oct. 6th, written to a man in Creston, in which the Kootenay deal was described as "a bone-headed sale which affected the market and should not have been permitted." He deplored the attitude of one organization taking the platform to vilify another and get publicity.

Mr. Taylor said the Committee had done their best to get the dirty linen washed at the meeting of the T. & C. Association at Vernon, and discussed the matter for three hours but did not get very far, but the Committee dropped a statement on price-cutting. Mr. Barnes, of the O.G., had made a statement as to price-cutting by independent shippers in order to induce growers to sign a 5-year contract. The Committee held that he should substantiate the charge, and they also held that the Kootenay deal should have been reported to the T. & C. Association. The memorandum was submitted at the afternoon session of the Association, but Mr. Barnes refused to give any information, stating that he would give details at the growers' meeting. The Committee believed that no one was particularly guilty but that price-cutting had been done all round.

Mr. Winslow said the Kootenay apples were distinctly less valuable than those of the Okanagan, and at the time he did not attach great importance to the fact that they were being sold at the price mentioned. It was quite a question in his mind whether the Kootenay apples should be in the Okanagan price arrangement. As it turned out, the Kootenay apples supplied Alberta pretty thoroughly and therefore bulked much larger than he had reckoned.

The Saskatoon car was again referred to shipped by the O.U.G. It was elicited that the Wealthies in it came from Grand Forks, and they were stated by Mr. Lowe to be in very bad shape. He denied that the car was on consignment.

Further discussion ensued but without any material evolving, and there were calls for Mr. Barnes, but he apparently was not present.

**B.C. Growers' Quotations**  
Answering a question as to whether his firm had quoted prices on apples lower than other shippers were quoted at the same time, Mr. McDonald said they were sold at \$1.60 to the Pioneer Fruit Co., Brandon. He did not regard this price as lower than the control price of \$2.10. It was with the No. 1's left in.

Mr. Lowe claimed that the B.C. Growers were guilty of price-cutting, as he understood the No. 1's were not packed out but were left in. This sort of thing had led to mud-slinging. In 1921 they were not, and the result was chaos in buying and selling. Mr. McDonald had made the price for winter \$2.10 like the rest at the start, but he did not cooperate with the other shippers; he was "slick" and had slipped it over.

Mr. McDonald said that every shipper at the meeting of the T. & C. Association on July 29th was willing to fix prices. He had stated in the meeting that \$2.10 was the price he was to ask for winter. His recollection of the Wealthy deal was that he told the purchasers the best would be packed out.

Mr. Lowe maintained that Mr. McDonald had taken undue advantage, and had quoted \$1.60 when the Association had fixed \$1.80 as the price on crates.

Mr. Bulman was subjected to much noisy interruption from the rear of the hall when he rose to speak, and the chairman had to admonish the hecklers. Mr. Bulman defended the Wealthy deal and said his firm had a right to change prices, provided they notified the Secretary of the Association, which they did.

Mr. Dunwaters had understood that the meeting was to be called for the advancement of the industry, and he thought bickering had proceeded far enough. He did not wish to see the shippers estrange themselves and he wanted to see them cooperate with each other and the T. & C. Association. "Let's all shake hands and stop this foolish, boyish squabbling," he concluded. (Much applause.)

Mr. Reekie expressed appreciation of the good sense in Mr. Dunwaters' remarks. The Committee had acted without malice. Charges and counter-charges had been made, and the Committee wanted to have the atmosphere cleared. The Committee was of the opinion that every shipper had acted in what he considered the best interests of his growers. No price-cutting was done until October and it was conditions that no human efforts could avert that had demoralized the fruit market rather than price-cutting. The Committee believed that the T. & C. Association should be strongly supported, its membership increased and confidence should replace suspicion. The committee of growers suggested by Mr. Doberer would help a long way towards success.

On a proposal being made to take a collection to cover travelling expenses of the Committee to Vernon, Messrs. Mutrie and Hayes pledged the T. & C. Association to meet the costs, and the Association was accorded a vote of thanks for its action.

After discussion of the method of choosing the committee of growers to attend meetings of the T. & C. Association, it was finally decided upon motion that until a permanent arrangement can be devised, the present Growers' Committee appoint a sub-committee from themselves to act. A very hearty vote of thanks was

REAL ESTATE AND INSURANCE

**ELLISON**

We are sorry to learn that little Emily Atack, who has been attending a kindergarten in Moose Jaw, has contracted measles, and her return home with her mother will therefore be delayed for a fortnight or so.

Mr. and Mrs. Fowler Caldwell and two youngsters moved into their new home on the Belgo last week.

The regular meeting of the Local U.F. last Wednesday evening was well attended, several ladies being present, and also Messrs. Munford and Lewis were up from Rutland again, principally in the interests of the campaign to get the Kamloops-Kelowna branch of the Canadian National railway completed in time to handle the 1922 crop. Owing to some meeting in town, the members of the Kelowna Board of Trade who were to have been at the meeting did not put in an appearance. However, Mr. Bulman went into the matter very thoroughly, and roused considerable enthusiasm, Messrs. Munford and Lewis, following his address, with a further emphasizing of the necessity for the completion of this railroad. General Harman read out the resolution drawn up, and after a few additions and alterations had been made it was circulated for the necessary signatures. A voluntary committee of six was elected to obtain all the signatures of persons in Ellison over twenty-one years of age. In addition to this, every one present pledged themselves to write individual letters to the Minister of Railways, or our representative at Ottawa Mr. Mackelvie, or Mr. Crerar. The intention is to follow up these activities with a deputation, and so cinch the matter, so to speak.

The committee elected to canvass for new members of the United Farmers, reported twenty-seven new members, after only a part of the district had been covered.

Now that the municipality as petitioned, the question of forming a Pound District was again brought up, and after some discussion, a motion was passed to the effect that we do not form a Pound District but fix our fences.

General Harman gave an interesting discourse on the combined potato association which will probably be in working order by next year. He spoke of his interview in Victoria with members of small potato associations from several points in British Columbia, and his suggestion to unite these scattered bodies was agreed to be a good thing. Later he saw the Minister of Agriculture in Vancouver, and had a very satisfactory interview.

A voluntary committee was elected to arrange for next week's social on Wednesday, the 19th.

passed to the Committee for their valuable services.

Before adjournment, a resolution was passed at the instance of Mr. Taylor as follows: This meeting learns with regret that the Premier has not yet announced the policy of the Government regarding the control of Codling Moth, although promises were made that this would be done as long ago as the 23rd January, and the time for commencing work has already arrived. This meeting further wishes to express to the Premier in the strongest possible way the urgent necessity for the additional funds asked for being provided immediately, otherwise the fruit growers of this province will be faced with disastrous losses annually.

The resolution was dispatched by wire the same night.

The Chilliwack Creamery Association has gone into voluntary liquidation.
